The first of these is the fact that the
 number of people who are employed in the
 service of the government is increasing
 rapidly. This is due to the fact that
 the government is expanding its activities
 in many fields, and is therefore
 requiring more personnel to carry out
 its functions. This is particularly true
 in the case of the armed forces, which
 are being expanded in size and
 equipped with more modern weapons.
 The second factor is the fact that the
 government is spending more money on
 its activities. This is due to the fact
 that the government is increasing its
 budget, and is therefore able to
 pay higher salaries to its employees.
 The third factor is the fact that the
 government is becoming more efficient in
 its operations. This is due to the fact
 that the government is adopting new
 methods of organization and management,
 and is therefore able to do more work
 with the same number of people.

The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, which are based on the principles of wave mechanics. The second part of the paper is devoted to a discussion of the experimental results obtained in the study of the structure of the atom. It is shown that the experimental results are in good agreement with the theoretical predictions.

1. The first part of the paper is devoted to a general
 introduction of the subject, and to a statement of the
 objects of the present investigation. It is shown that
 the problem of the existence of a solution of the
 differential equation $y'' + p(x)y' + q(x)y = r(x)$
 is a problem of the first order, and that it is
 solvable in the case of a continuous function $r(x)$.
 The second part of the paper is devoted to a
 detailed study of the properties of the solution
 of the differential equation. It is shown that the
 solution is unique, and that it is continuous
 in the case of a continuous function $r(x)$.
 The third part of the paper is devoted to a
